

Productive Math Struggle

Book Study

PRODUCTIVE MATH STRUGGLE Book Study

Welcome to the book study for Productive Math Struggle. We know professional development is important to teachers, but we also recognize that there are a lot of demands on your time. We have deliberately designed this book study to be collaborative so that most weeks the group is splitting the recommended in-class activities among the members of the book study. Each book study participant comes to the group ready to share in-class strategies and activities that she was assigned. That way everyone gets the benefit of all of the learning, strategies, and activities shared in Productive Math Struggle without having to personally practice every strategy.

By the end of the book study, as a group you will have:

- Determined what productive math struggle is, what it looks like, and why it is important
- Created a list of productive belief statements with your students to post in your classroom
- Developed a better understanding of your own math identity and how it relates to your productive struggle actions
- Helped your students define their individual math identities and learned about activities that help students explore math identity
- Learned about activities to build a productive math community in your classroom
- Learned about activities to promote a community that understands productive struggle
- · Discovered how to determine if a math task is high quality
- Learned about modification strategies to ensure a task is high-quality
- Explored 5 different types of struggle and indicators for each
- Learned about strategies for struggle moves that don't rescue student answers but rescue student thinking
- Studied 10 teacher tips to help students navigate struggle
- Discovered why student and teacher reflection on struggle is important
- Learned about student and teacher activities to reflect on struggle
- Explored strategies to celebrate struggle
- Created a strategy as to how the group, and you personally, will continue to incorporate productive struggle into your classrooms

We've even created a Productive Math Struggle Chart for you so that you have a record of the activities/strategies that you and your colleagues have tried over the course of the book study with notes about what you did, what worked, and what you would change.

Thank you for selecting *Productive Math Struggle* for your book study. And thank you for the hard (and joyful) work you do every day to teach math to our children.

INTRODUCTION: Why Struggle? Why Now?

Q
Δ

During Reading

1.	DESCRIBE a struggle you have had as a student and one	
	you have had as a teacher,	
	noting how each struggle affected you.	
2		
2.	WRITE a definition for	
2.	productive struggle. You can	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can record this here or on page 6	
2.	productive struggle. You can record this here or on page 6	
2	productive struggle. You can record this here or on page 6	
2	productive struggle. You can record this here or on page 6	

3. **COMPLETE** the Productive Struggle Self-Inventory, located on the companion website as well as at the end of this book study pdf.

1. SHARE the struggles you have had with math as both a student and as a teacher.

CHAPTER 1: Value Productive Struggle

Synopsis:

- · Defines productive struggle and what it looks like
- Establishes why productive struggle matters
- Describes the kind of learning that can take place in a classroom that values productive struggle

Reading Timeline

(here's how you might divide the reading into manageable segments)

DAY 1: Read pages 8-16

DAY 2: Read pages 16-25

DAY 3: Read pages 26-28

During Reading

1.	REFLECT upon the sentences, "Math is more than the pursuit of answers. Math is a way of thinking and understanding." (page 12). Note what you are currently doing in your classroom to help your students understand that math isn't just about getting the right answer.		
2.		s list s	our classroom who are exhibiting behaviors associated so that you can revisit ways to help move students from
	STUDENT NAME	_	BEHAVIOR
		_	
		_	
		_	
		_	
		_	
		_ _	

	SHARE what each of you is currently doing in your classrooms to	
	demonstrate that "Math is more than the pursuit of answers." Note ideas your colleagues are using.	
	your coneagues are using.	
2.	NOTE the evidence or actions in your classrooms that show that	
	you and your students value productive struggle.	
3.	As a group, IDENTIFY unproductive beliefs and turn them into a group	
	list of productive belief statements. Use the chart on pages 26–27 to	
	guide your thinking.	

	Using figure 1.2 (located on the companion website, as well as	
	at the end of this book study	
	pdf), visit one of your book study colleague's classrooms (remember	
	you only need 10-15 minutes),	
	and COMPLETE the productive struggle tool. Have your colleague	
	do the same in your classroom.	
2.	SHARE your productive belief	
	statements with your students and edit to reflect their ideas. Post the	
	final list in your classroom.	

CHAPTER 2: Foster an Identity for Productive Struggle (two sessions)

Synopsis:

- Examines how your mathematical identity affects your students' mathematical identities
- Explores how promoting healthy math identities supports productive math struggle
- Provides activities to familiarize you with your students' math identities

Reading Timeline

(here's how you might divide the reading into manageable segments)

DAY 1: Read pages 29–36 (stop at Knowing Your Student's Mathematical Identities)

DAY 2: Read pages 36–42 (stop at Student Identity Activity 5)

DAY 3: Read pages 42-47

SESSION 2

During Reading

Using figure 2.1, REFLECT upon your own math identity as a learner and as a teacher. Using the answers to the questions, write a short paragraph that	
captures your math identity as a teacher.	
Into the Classroom (Prior to	o Group Meeting)
 Into the Classroom (Prior to Have your students complete the math survey questions in figure 2.2. 	Group Meeting)
Have your students complete the	Group Meeting)
Have your students complete the math survey questions in figure 2.2.	Group Meeting)
Have your students complete the math survey questions in figure 2.2.	Group Meeting)
Have your students complete the math survey questions in figure 2.2.	Group Meeting)
Have your students complete the math survey questions in figure 2.2.	Group Meeting)

7	•	
,	SHARE your paragraphs about your math identity as a teacher	
	and discuss.	
2.	SHARE some of your students'	
	math surveys and as a group determine challenges you may all	
	be facing as to how students view themselves as mathematicians	
	and you as their teacher.	

	SELECT one of the student identity activities 1–3 and 5–7 to complete prior to the next group meeting.	
	Ideally all six activities will be covered.	
	covered.	
4.	DISCUSS how you would like your	
	students' identities to grow over time.	
	une.	

Into the Classroom (After Group Meeting)

Do the Student Identity Activity you selected and RECORD your notes on what you did, what worked, and what you would change on the Productive Math Struggle Chart at the end of this book study.

CHAPTER 2: Foster an Identity for Productive Struggle (two sessions)

SESSION 2

REREAD the description of the student activity you selected.

As a Group

- 1. SHARE Student Identity activities (bring student work) paying particular attention to what you did, what worked, and what you might change. Discuss how you might monitor your students' identities over time. Record your notes on your Productive Math Struggle Chart.
- 2. SELECT one Community Activity from Chapter 3 (pages 57–66) and one Community of Struggle Activity (pages 67–72) to read about and try in your classroom before the next group meeting. Ideally all activities will be covered.

Into the Classroom (After Group Meeting)

SELECT at least one additional Student Identity Activity to do with your class. Let your colleagues' experiences with the selected activity guide you in your successful execution.

Notes			

CHAPTER 3: Build Community for Productive Struggle

Synopsis:

- Explains why community is critical to productive struggle
- Discusses how to develop and sustain a mathematical community
- Provides activities to build a math community and to create a shared understanding of productive struggle

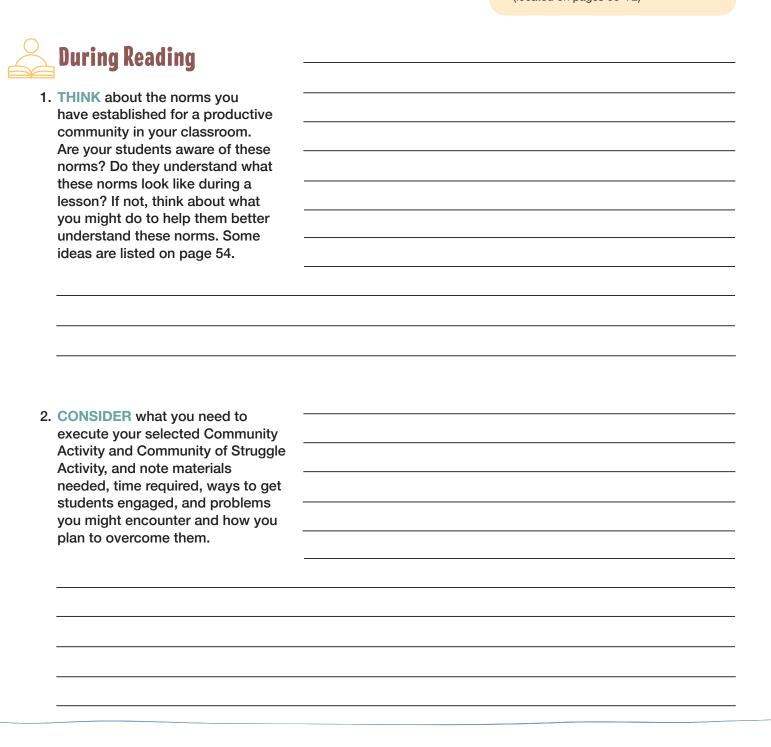

Reading Timeline

(here's how you might divide the reading into manageable segments)

DAY 1: Read pages 48–56 (stop at Activities)

DAY 2: Read about your selected Community Activity (located on pages 56–66)

DAY 3: Read about your selected Community of Struggle Activity (located on pages 66–72)

Into the Classroom (Before Group Meeting)

- 1. INTRODUCE your Community Activity and note what you did, what worked, and what you might change. Record your thoughts on your Productive Math Struggle Chart.
- 2. INTRODUCE your Community of Struggle Activity and note what you did, what worked, and what you might change. Record your thoughts on your Productive Math Struggle Chart.

As a Group

- 1. SHARE your Community Activities (bring student work) paying particular attention to what you did, what worked, and what you might change. Record your thoughts on your Productive Math Struggle Chart.
- 2. SELECT two Modification Strategies from chapter 4 (pages 86–100) to introduce in your classroom prior to the next group meeting. Each strategy requires a team of at least two people, and ideally all 11 strategies will be covered by the group.

Into the Classroom (After Group Meeting)

SELECT at least one additional Community Activity to do with your class. Let your colleagues' experiences with the selected activity guide you in your successful execution.

Notes			

CHAPTER 4: Plan for a Lesson With Productive Struggle (two sessions)

Synopsis:

- Examines how to rethink planning to provoke productive struggle
- · Explains the features of high-quality math tasks
- Provides strategies on how to modify tasks to increase opportunities for productive struggle

Reading Timeline
(here's how you might divide the reading

DAY 1: Read pages 73-80

into manageable segments)

DAY 2: Read pages 81–86 (stop at Modification Strategy 1)

DAY 3: Read about the two Modification Strategies you selected (located on pages 86–100) and pages 100–104 (stop at Instructional Models, Routines . . .)

SESSION 1

1.

2.

During Reading

Use figure 4.5 (page 79) to EVALUATE some of the tasks that you are currently using in your classroom to determine which tasks are high quality.	
REVIEW the tasks you	
determined are high quality to determine tasks that promote conceptual understanding,	
procedural fluency, and application.	
application.	

Into the Classroom (Before Group Meeting)

- 1. After you have read about your selected Modification Strategies and have read pages 100-104, meet with your partner(s) assigned to the same modification strategies to do the tasks and anticipate what students might do. RECORD your notes about possible student strategies and misconceptions, as well as your questions in response to those strategies and errors on your Productive Math Struggle Chart (Modifications section).
- 2 MODIFY a task. Use it in your classroom. Record your notes on your Productive Math Struggle Chart

rategies they used, reporting on student engagement, deas for improvement. RECORD your notes on your ations section).
deas for improvement. RECORD your notes on your
deas for improvement. RECORD your notes on your
deas for improvement. RECORD your notes on your
deas for improvement. RECORD your notes on your

CHAPTER 4: Plan for a Lesson With Productive Struggle (two sessions)

DAY 1: Read pages 104–110

SESSION 2

During Reading	
REFLECT on how group size and composition contribute to or detract	
from a student's productive struggle.	

As a Group

- 1. Remaining teams SHARE the modification strategies they introduced into their classroom, reporting on student strategies, misconceptions, teacher response, and ideas for improvement. Record your notes on your Productive Math Struggle Chart (Modifications section).
- 2. SELECT a Struggle Move from chapter 5 (pages 119-137) to introduce into your classroom prior to the next group meeting. Ideally all five moves will be covered.

Into the Classroom (After Group Meeting)

SELECT at least one Modification Strategy presented by your colleagues to try in your instruction. Let your colleagues' experiences with the selected strategy guide you in your successful execution.

Notes			

CHAPTER 5: Support the Productive Struggle During the Lesson

Synopsis:

- Examines and provides indicators for various types of struggles
- Shares classifications of teacher responses to struggle
- Provides strategies to responding to student struggle and teacher tips for how best to support product struggle

Reading Timeline

(here's how you might divide the reading into manageable segments)

DAY 1: Read pages 111–119 (stop at Struggle Move 1)

DAY 2: Read about the Struggle Move you selected (located on pages 119–137)

DAY 3: Read pages 137–146

During Reading

- Using Figure 5.1 (page 114), DETERMINE how the students in your classroom are currently struggling. Take notes using figure 5.2 (page 116), also located on the companion website and at the end of this book study pdf.
- 2. REFLECT on how you are currently supporting struggle, which teacher tips (pages 137–146) you are currently using in your classroom, and which tips you would like to try.

Into the Classroom (Before Group Meeting)

Try the Struggle Move you selected and note what you did, what worked, and what you would change. RECORD your thoughts on your Productive Math Struggle Chart.

- 1. SHARE the Struggle Move you used in your classroom and discuss what you did, what worked, and what you would change. Record your thoughts on your Productive Math Struggle Chart.
- SELECT two Student Activities from chapter 6 (pages 151–164) to try in your classroom before the
 next group meeting. Select each activity from a different group—Independent Writing & Drawing,
 Collaborative Reflections, or Evaluative Reflection Activities.

3.	DISCUSS other Struggle Moves you have used or thought of as you think about how you can			
	support student struggle without taking over for them.			

Into the Classroom (After Group Meeting)

- 1. Try at least one Struggle Move, reported on by a colleague, and note what you did, what worked, and what you would change. RECORD your thoughts on your Productive Math Struggle Chart.
- 2. Try one or two of the teacher tips and note what you did, what worked, and what you would change. RECORD your thoughts on your Productive Math Struggle Chart.

Notes			

CHAPTER 6: Reflect on Productive Struggle

Synopsis:

- Explains the value of reflecting on struggle
- Shares strategies and activities for student reflection on struggle
- Provides strategies and activities for teacher reflection about struggle

Reading Timeline

(here's how you might divide the reading into manageable segments)

DAY 1: Read pages 147–151 and about the two Student Activities you selected (located on pages 151–164)

DAY 2: Read pages 164–172

During Reading

۱.	THINK about how often students should reflect on struggle and how you can incorporate these reflections into your classroom routine. See pages 164–165 for guidance.	
2.	REFLECT upon how you currently celebrate productive struggle in your classroom.	

Try the two Student Activities you selected and note what you did, what worked, and what you would change. RECORD your thoughts on your Productive Math Struggle Chart.

As A Group

1.	SHARE the Student Activities you tried in your classroom and discuss what you did, what worked, and
	what you would change. Record your thoughts on your Productive Math Struggle Chart.

^	OLIA DE Sala a a ala asset la assessa de	
۷.	SHARE ideas about how you	
	celebrate productive struggle in

	the future.	

Into the Classroom (After Group Meeting)

- 1. Try at least one Student Activity, reported on by a colleague, and note what you did, what worked, and what you would change. RECORD your thoughts on your Productive Math Struggle Chart.
- 2. TRY one of the Teacher Reflection Options (pages 166–168).

CHAPTER 7: Closing Thoughts About Struggle

During Reading

1.	WRITE a new definition for productive struggle. You can record this here or on page 175 of your book. How does it differ from the definition you wrote several	
	weeks ago?	
2.		Self-Inventory located on the companion website as well as at do your responses differ from when you first filled out the self-

PRODUCTIVE STRUGGLE CLASSROOM WALKTHROUGH TOOL

Indicators may not be present due to length of visit.

High-quality task is the centerpiece of the lesson.
Lesson is focused on understanding the math rather than simply finding a solution.
The classroom environment shows evidence of resources that support student struggle.
Students have access to instructional resources and mathematics tools.
Students are purposefully engaged in the task.
Students attempt to overcome challenges.
Students ask questions about the task or how they might proceed.
Students support one another without taking over.
Teacher circulates to monitor student thinking, progress, and struggle.
Teacher pauses engagement to discuss strategies, representations, or questions.
Student solutions are discussed and explored when the task is debriefed.
Debriefing discussion highlights challenges and strategies used for overcoming them.
Students reflect on struggle at the end of the lesson.

Feedback:
