Renowned international educators to speak at Calgary conference

CALGARY (AUGUST 7, 2018)— Corwin, the leading professional learning provider for K-12 educators, is pleased to bring together the greatest minds in education. It will host a series of two-day Visible Learning^{plus} Foundation Institutes in Calgary and two other major Canadian cities throughout the summer and fall.

The event will take place at the Coast Plaza Hotel & Conference Centre from August 23rd through the 24th. The others will take place in Toronto from August 21st through the 22nd and Vancouver from November 5th to 6th.

The timing is particularly significant as they follow Corwin's April global acquisition of Visible Learning^{plus}, the model of school change based on Australian professor John Hattie's internationally renowned research. Professor Hattie will be the keynote speaker at both the Toronto and Calgary events.

As John Hattie's partner and the official global provider of Visible Learning^{plus}, Corwin President Mike Soules said, "We have the opportunity to give every child an education that is built by design. We are excited to share the latest developments in the Visible Learning research with our Canadian attendees and provide impactful strategies for educators to bring back to their classrooms."

The Institute in Calgary is in partnership with Nelson, Canada's leading educational publisher, and the Calgary Regional Consortium, a provider of professional learning opportunities for K-12 educators in and around Calgary.

Attendees will learn from education thought leaders who will share insights from the world's largest research on what works best in student learning. In addition to Professor Hattie, other speakers include:

- Former Gatineau Quebec School Board education director Ainsley Rose
- Best-selling author and professor John Almarode, Co-Director of the Centre for STEM Education and Outreach at James Madison University in Harrisonburg, Virginia

- Olivia Amador-Valerio, award-winning elementary school principal from Chula Vista, California

The Visible Learning research is a culmination of over 25 years of examining and synthesizing more than 1,400 meta-analyses comprising approximately 90,000 studies involving over 250 million students around the world. Visible Learning^{plus} translates this groundbreaking research into a practical model of analysis and evaluation through professional learning district and school-wide.
