## Renowned Educational Futurist Dr. Sonny Magana Publishes New Book on the Future of Education

*Disruptive Classroom Technologies: A Framework for Innovation in Education* shows educators how to innovate rather than simply digitizing their classroom.

**Los Angeles, CA** – September 26, 2017 – Technology is becoming ubiquitous in today's classrooms—but mere access to state-of-the-art educational technologies will not automatically transform teaching and learning. Despite the billions of dollars spent yearly equipping classrooms with educational technologies, its impact on student learning has been both meager and unchanged after nearly half a century. Why are we continuing to fund, at considerable cost and effort, classrooms that are digitally rich but innovatively poor?

[Dr. Sonny Magana](#) has compiled four decades of ground-breaking research resolving the wicked problem of effective technology integration into his new book with Corwin, [Disruptive Classroom Technologies: A Framework for Innovation in Education](#), which is being hailed by global educational experts.

*Disruptive Classroom Technologies* promises to disrupt the current low-value uses of classroom technologies with a new T3 framework that advances instructional innovations with technology to maximize student learning productivity. T3 helps educational systems categorize students' learning with technology as Translational, Transformational, or Transcendent, sorting through the low-value applications to reach high-value, high-impact usage of readily available classroom technologies.

*"When it comes to technology in the classroom, we are simply not getting our money's worth in terms of unleashing students' limitless learning potential,"* says Dr. Magana, founder of Magana Education. *"That hurts us all, by underserving our most precious natural resource—our youth. That's why I'm committed to helping modern educational leaders and educators follow the direction provided by quality research evidence and innovate rather than simply digitizing their classroom practices."*

Schools who use the elements in the T3 Framework have seen dramatic gains in instructional quality and student learning performance. *"I have personally observed the power of Sonny's work in our own school district,"* says

superintendent Brian Pearson. *“Gaylord Community Schools has embraced the T3 framework and as a result is a better place for students to learn and staff to teach.”*

*Disruptive Classroom Technologies: A Framework for Innovation in Education* is now available through [Corwin](#).

### **About Dr. Sonny Magana**

Dr. Sonny Magana is an award-winning educator, best-selling author, and pioneering educational technology researcher. Sonny is a highly sought-after leadership consultant and instructional coach with more than thirty years' experience helping educational systems around the world realize the power of transcendent learning.

### **About Corwin**

**Corwin**, a SAGE company, is the premier provider of professional learning products and services that equip educators to improve teaching and learning. Corwin offers print books and ebooks, digital products, and on-site consulting services for all types of educators at all stages of their careers. Corwin resources are authored by experts on the topics most relevant to education; formatted for hands-on, practical guidance; research-based and peer reviewed for quality; and designed for professional learning.
