In this lesson sequence, students read realistic, fictional narratives as a lead in to writing personal narratives. We focus on the temporal order of stories in our reading and retellings and use a first-next-then-last framework to recall the events and details of our own stories. Students learn to add onomatopoeic elements to their writing by studying its use and effect in stories and poetry.

Although this sequence is designed for first grade, many of the instructional elements are suited for kindergarten and second grade; only small tweaks are necessary (see grade level adaptations on pages 31 and 32).

This sequence is intended as an introduction to narrative writing. Though students may eventually write a variety of narratives that venture into fiction (e.g., fantasy stories), we focus here on personal narratives. Young writers are generally successful at recalling events that have actually happened to them, so I find this a good place to start. Since this may be students’ first attempt at writing personal narratives, we keep things simple, with most of our focus on retelling the events in our stories in sequential order. We use the temporal words suggested in the standard, first, next, then, and last, to talk out and plan. As we move through the sequence, we add in onomatopoeia as a simple craft element to liven up our compositions.

Naturally, we immerse ourselves in reading the genre we’re writing. We read several realistic stories containing real-lifelike characters and situations. We mine these models for topic ideas and study how the authors sequence their events and use onomatopoeia.

The teacher models throughout and makes use of student volunteers to make the steps in the process explicit. Students constantly talk out their stories, share their thinking, and receive feedback from one another. They draft using a recursive model: writing a bit, then rereading, making any changes needed, talking it out a bit more, then continuing to draft.

This sequence was written with first grade in mind, but can easily be adjusted up or down by eliminating the focus on onomatopoeia or adding an additional focus (several are noted in Extending the Work on page 47).

Core Connections
Focus Writing Standard 3 integrated with Reading Literature Standard 4
Reading Literature Standards 1, 2, 4, 7, and 10
Writing Standards 5
Speaking and Listening Standards 1, 2, 4, 5, and 6

Task
Write a story about something that has happened to you. Tell your story in order: what happened first, next, then, and last. We’ll share our stories with friends and family.

What Students Do Across the Week

Students read realistic narratives to get ideas for writing their own personal narratives. We focus on how stories are told in temporal order and model our writing after the mentor texts. Students walk away with a completed draft of a personal narrative that they are proud to share!

While reading a variety of realistic narratives, students pay close attention to how stories unfold in a logical sequence. In other sequences and other narrative reading, we’ve focused on basic story elements and structure: setting, characters, problem, events, and solution. Given our focus here, students practice retelling the stories they read using the words first, next, then, and last. This becomes the structure they use when preparing to write their own personal narratives.

We begin a class topics list to keep track of our story ideas. Students talk out their ideas with one another, often spending about five minutes on this step. In Grades K–2, oral rehearsal before writing is critical, as many children can access their narrative abilities verbally more easily than when writing. Once students settle on a topic, they plan their stories using sketches and words in four boxes labeled First, Next, Then, and Last. The intent is to get the bones of their stories recorded so they can go back and add more details later. Using their plans, they talk out their stories again as a rehearsal for writing. I model the processes all along the way, and confer with students as I circulate to respond to their efforts.

Additionally, we add some flair to our writing by adding onomatopoetic elements. We study stories and poetry to help us understand and incorporate these elements. Students add an onomatopoetic word or two to their story plan and talk it out again, emphasizing (and relishing!) these fun words. Onomatopoeia is a clear-cut device, which lays the foundation for then introducing alliteration and other craft elements.

The intent of the sequence is to give students a solid first experience with personal narrative writing. Their writing is not “formally published.” It is not revised and edited, though revision and editing do occur when students plan their stories, talk them out, add onomatopoetic elements, share and talk with peers while writing, and when I confer with them.

To culminate the sequence, we share our stories with each other and students are invited to take them home to share with their families. When we debrief, we focus on new possibilities for personal narrative writing and extending into other types of narratives.

Notes

Literacy Moves

- Widely read the genre
- Focus study of craft element
- Sketch, label, jot
- Begin an anchor chart for the genre
- Modeled writing
- Independent writing
- Talk it out
- Discuss
Narrative Reading

Getting Ready

**The materials:**
- Copy of the task (page 1) to display
- *Knuffle Bunny* by Mo Willems
- The words *First, Next, Then,* and *Last* written on a chart

**Context of the Lesson**

After discussing our task, we read a fun, realistic story about an event most students can relate to. We then have an open-ended conversation. Though we are accustomed to pointing out story elements and thinking about narrative structure in terms of setting, characters, problem, events, and solution, we reread looking for story highlights that stand out first, next, then, and last. We retell the story using those temporal order words.

**The Lesson**

“As you can see, (pointing to the task) we will be working this week toward writing a story about something that has happened to us. These are called *personal narratives.* We know narratives are stories. Personal narrative means they are true stories about us. They don’t have to be about big events or happenings in our lives, they can be about something small. We’ll come up with lots of examples together so you get the idea.

“We’ll start out by reading a narrative about a child who, though younger than you, goes through something I bet you can relate to. I’ll read the story aloud to you. Let’s just enjoy it. If you have any questions or observations that come up, keep them in your head, so we can come back to them after reading.”

(After reading aloud) “Did anyone have a question or observation about the book?”

(*Discuss these with the students, encouraging peers to respond to one another.*)

Examples:

**S:** I didn’t know what a laundromat was, but then I saw what it was in the pictures.

**S:** Me, too! I figured it out in the pictures, too!

**T:** Great observations. Yes, often by reading on, we can figure out words we’re not sure about. And, we can’t forget how useful illustrations can be. Study them carefully!

**S:** Why didn’t the dad understand Trixie? I knew what she wanted right away!

**S:** I did, too! She was so upset because they left the bunny at the laundromat!
“Yeah, I saw the bunny was missing in the picture as soon as they left.”

“Okay, so does anyone have an idea why Trixie’s dad didn’t understand?”

“He didn’t see the bunny was missing. And, she couldn’t talk right. She was making all those sounds and throwing a fit. My mom and dad get mad at my little brother when he throws a fit.”

“It was good that Trixie’s mom saw Knuffle Bunny was missing.”

“How do you think Dad felt then? Let’s look back for clues in the illustrations.

This kind of open-ended collaborative conversation is a perfect way to get students involved in asking their own questions about the story elements and details. The questions and answers they model for one another push everyone’s thinking.

“Thank you so much for your insightful questions and comments! We’re going to switch gears now and reread the text. Our purpose for rereading will be to identify the high points in the events. If you were going to tell someone about this book, and could only tell briefly about what happened first, next, then, and last, what would you tell them? Basically, we’ll work together to create a short, sequential summary using those key words (I list the words first, next, then, and last on a poster for students to reference). As we go, we’ll put sticky notes in the book to help us remember where these important points are (the sticky notes are labeled with the key words first, next, then, last).”

“We’ve taken time to identify first, next, then, and last because authors can use these key words and the idea of sequential order to plan their stories. We will be using this strategy when we plan our personal narratives. It’s good to practice with stories we read aloud first.

“Now, I’d like you to turn to your neighbor and retell what happened in the story using the key words on the poster. I will turn to the pages we marked in the book, and you can look up here and use them as hints to help you if you need them. One partner takes a turn then it’s the other partner’s turn. I’ll page through a second time, in case the other partner needs help.”

Students retell the story using the words first, next, then, and last. If they have trouble, I model it for them, emphasizing use of the temporal words and talking it out in whole sentences as I retell.
Recap: Key Lesson Steps

1. Study the task
2. Define personal narrative
3. Read narrative story for enjoyment
4. Have an open-ended discussion
5. Reread the story, tagging the most important events for first, next, then, and last
6. Have students retell the story to a partner using the key words *first*, *next*, *then*, and *last*

Wrap Up

End by reminding students of where and why they are focusing their efforts. “Next, we’ll go a bit further with the idea of focusing on the key story events that happened first, next, then, and last. This will help prepare you for planning your own story.”
Quick Sketch Retelling

Getting Ready

The materials:
- Copy of *Knuffle Bunny* by Mo Willems (with sticky notes inside)
- Think pads or scratch paper
- First-Then-Next-Last poster, available on the companion website
- Document camera

Context of the Lesson

Students will practice the concept of temporal order using the words *first*, *next*, *then*, and *last* through another modality: sketching. They fold a paper into four boxes, then sketch, jot, and label about the key events we identified in *Knuffle Bunny*.

The Lesson

“Now we’ll practice the structure of this simple story one more way using the words *first*, *next*, *then*, and *last*. The author, Mo Willems, may have actually planned his story out just like this. Fold your paper into fours. Label each box in order: first, next, then, last (*I model under the document camera*). Now draw a quick sketch of the most important happening that occurred first, next, then, and last. Also add jottings and labels, if you can. This way, we’re showing the *bones* of the story—the highlights of what happened in the order that things took place. Watch me. (*I model sketching, jotting, and labeling in the first box, looking back at our first sticky note in the book*).”

Next, I differentiate: “If you’d like to continue to stay up here on the rug to work with me, you can. We will work through each box together and look at the book if we need to. If you feel ready, you can return to your desk and work on your other three boxes yourself. We’ll share afterwards.”

When students finish, they find a peer to share. Their comments and work in boxes is useful formative assessment. I can quickly see who understands the concept of temporal order and who might need more support.

Recap: Key Lesson Steps

1. Model sketching the first key story event, adding jottings and notes
2. Have students complete boxes independently or with teacher guidance
3. Revisit the book as needed
4. Have students share

Core Connections

Grade 1
Reading Literature
- Standard 2
  Retell stories, including key details.

Reading Literature
- Standard 7
  Use the illustrations and details in a text to describe its key ideas.

Speaking and Listening
- Standard 5
  Add drawings or other visual displays to descriptions when appropriate to clarify ideas, thoughts, and feelings.

Core Practices

- Revisit Text
- Modeling
- Guided Practice
- Differentiated Support
- Sketch, Jot Notes, Label
- Discussion
**Wrap Up**

“Think about how Mo Willems might have used this strategy to plan his story. How would sketching, jotting, and labeling in the first, next, then, and last boxes help someone prepare to write? (Discuss.) We will use this same strategy to plan our own stories. Once we decide our topics, or what we’ll be writing about, thinking about first, next, then, and last will challenge us to remember what happened in what order. We’ll also sketch and jot. Then, we’ll have the bones or basics of our stories and we can fill in details from there.”

**Companion Website Resource**

If students have not had much previous experience reading personal narratives, it is best to repeat this two-lesson cycle for several more books. It’s time well spent, because students cannot be expected to write in a genre they don’t understand. See mentor texts on page 45 for suggested titles.
